

## **Manhattan Associates' Warehouse Management Solution Achieves 'Powered by SAP NetWeaver' Status**

November 28, 2007 1:37 PM EST

### **Certified integration enables efficient flow of goods through the supply chain with effective connectivity to the SAP® Business Suite**

**Atlanta - November 28, 2007** - Global supply chain solutions provider Manhattan Associates, Inc. (Nasdaq: MANH - News) today announced that its Warehouse Management 2007 solution has achieved "Powered by SAP NetWeaver®" status. This certification highlights Manhattan Associates' commitment to providing a full suite of integrated supply chain solutions, allowing customers using SAP® solutions to integrate distribution business processes seamlessly, and with less risk, within their corporate landscape.

The SAP Integration and Certification Center (SAP ICC) has certified that the Manhattan Associates' Warehouse Management 2007 solution properly integrates with the SAP NetWeaver Exchange Infrastructure (SAP NetWeaver XI) 3.0 component to exchange critical data with instances of the SAP Business Suite family of applications and is integrated successfully with SAP NetWeaver Portal 6.0.

Manhattan Associates utilizes the SAP NetWeaver platform to run integration scenarios between the two solutions, thereby incorporating the preferred integration platform from SAP and eliminating the added time and expense associated with custom integrations.

"It is a top priority for Manhattan Associates to seamlessly integrate our solutions with existing platforms to provide optimum benefits for our customers," said Eddie Capel, Manhattan Associates' senior vice president of product management and support. "Providing an integrated solution that is validated by this SAP certification reduces risks for our customers, while also significantly lowering implementation and ongoing maintenance costs."

Manhattan Associates also achieved certification for enabling Warehouse Management content within the SAP NetWeaver Enterprise Portal. Supply chain managers now have centralized, real-time visibility to the performance of a distribution facility and its key metrics, allowing them to make decisions on the fly and allocate resources appropriately to streamline the fulfillment process.

Manhattan Associates' Warehouse Management solution complements the SAP Business Suite by providing a feature-rich warehouse planning and execution system that allows customers to effectively execute supply-chain processes while providing all relevant feedback to the SAP ERP application that manages the overall business. Cross-component business processes are executed between SAP applications and Manhattan Associates modules in real-time, where Integrated Warehouse Management interacts with the Sales and Distribution and Materials Management applications of the SAP solution.

The Manhattan Associates solution used together with SAP solutions allows enterprises to manage advanced supply-chain scenarios with the necessary scalability and performance that is essential for a growing business.

The SAP NetWeaver platform powers the SAP Business Suite, SAP xApps™ packaged composite applications, and solutions such as Warehouse Management from Manhattan Associates. SAP NetWeaver unifies integration technologies into a single platform and is pre-integrated with business applications, enabling change and reducing the need for custom integration.

### **About Manhattan Associates, Inc.**

Manhattan Associates® provides global supply chain solutions to organizations that consider supply chain software, processes and technology strategic to market leadership. The company's software portfolio includes five key Supply Chain Solution Suites: Planning and Forecasting, Inventory Optimization, Order Lifecycle Management, Transportation Lifecycle Management and Distribution Management. These solution suites are enhanced by Platform Applications - including Supply Chain Intelligence, Supply Chain Visibility and Supply Chain Event Management - that organize and deliver the information and processes needed to optimize supply chains across functions and locations within and outside an enterprise. A Supply Chain Process Platform provides a unifying architecture that fosters agility and scalability while minimizing solution implementation, evolution and support costs. More than 1,200 customers worldwide use Manhattan Associates' global supply chain solutions to enhance profitability and build sustainable competitive advantage.
