Manhattan Associates Reports First Quarter 2017 Performance

ATLANTA – April 20, 2017 – Leading Supply Chain Commerce Solutions provider Manhattan Associates, Inc. (NASDAQ: MANH) today reported GAAP diluted earnings per share for the first quarter ended March 31, 2017 of \$0.40 compared to \$0.38 in Q1 2016, on record license revenue of \$22.8 million and total revenue of \$143.5 million. Non-GAAP adjusted diluted earnings per share was \$0.42 in both Q1 2017 and Q1 2016.

"Our first quarter results reflect the balance between strong license fee performance and retail macro challenges. Q1 represents another record license quarter with solid pipeline activity in all three regions against a strong comparable. Our Professional Services business continues to experience headwinds muting solid financial performance across all other key metrics," said Eddie Capel, president and chief executive officer of Manhattan Associates.

"We expect that retail market headwinds will persist throughout 2017 as many retailers address strategic challenges with enterprise transformation. While those transformations bring opportunities for Manhattan, they can also slow decision making. Given the outlook, we have lowered our revenue expectations for the year while maintaining our earnings per share guidance. More importantly, we continue to be very bullish on the market opportunity ahead of us and are investing significant energy and capital into innovation and advancing the world's leading suite of Supply Chain Commerce solutions to extend our market leadership in 2017 and beyond."

(a) Adjusted results exclude all equity-based compensation, to facilitate comparison with our peers and for the other reasons explained in our Current Report on Form 8-K filed with the SEC on the date hereof. Equity-based compensation is included in the following GAAP operating expense lines for the three months ended March 31, 2017 and 2016:

		Three Months En

(b) During the first quarter of 2017, we adopted Accounting Standards Update (ASU) 2016-09, Compensation – Stock Compensation: Improvements to Employee Share-Based Payment Accounting, to improve the accounting for employee share-based payments. Under the new guidance, all excess tax benefits and certain tax deficiencies are recognized as income tax expense or benefit in the income statements on a prospective basis, rather than recorded in additional paid-in capital. The adjustment represents the excess tax benefits of the stock awards vested during the period. Excess tax benefits occur when the amount deductible for an award of equity instruments on our tax return is more than the cumulative compensation cost recognized

for financial reporting purposes. As discussed above, we excluded equity-based compensation from adjusted non-GAAP results to be consistent with other companies in the software industry. Therefore, we also excluded the related tax benefit generated upon their vesting.

(c) Adjustments represent purchased intangibles amortization from prior acquisition. Such amortization is excluded from adjusted results to facilitate comparison with our peers, to facilitate comparisons of the results of our core operations from period to period and for the other reasons explained in our Current Report on Form 8-K filed with the SEC on the date hereof.
